

## Community Sustainability Gathering

Earlier this year, the Greensboro City Council created the Community Sustainability Council (CSC). The mission of the CSC is “to present City Council with specific proposals for reducing local carbon emissions, reducing energy usage, and conserving resources...” On November 13, 2008, the CSC will host a gathering to bring together groups and people who are working on, or interested in working on, sustainability initiatives. The purpose of the gathering is to:

- Collect input and ideas for the CSC, and others, to incorporate into our work.
- Help people become aware of what’s already being done and who is doing it.
- Connect people and groups with similar interests.
- Create a more informed, focused, and unified community network for more effective progress on sustainability issues.

This gathering is for any person or group with an interest in moving Greensboro toward a more sustainable future.

**When:** Thursday, November 13, 2008, 4 – 7 pm

**Where:** Holy Trinity Church, 607 N. Greene St.

**Cost:** Free
